

JECINTA KING'ATHIA

About Me

I am a Passionate and dedicated tech enthusiast currently advancing my skills in full-stack development through the PLP program. With a strong foundation in front-end development, I am eager to expand my expertise in both back-end technologies and database management. I thrive on problem-solving, continuous learning, and building innovative digital solutions. My goal is to contribute to impactful projects while growing as a well-rounded developer in the tech industry.

SHE TECH NEXUS AFRICA

MARKETING LEAD

- Teamwork to ensure that She Tech grows to be a great tech community for women and girls passionate about technology.
- Collaborating with teams to make She Tech popular among the university students

As a front-end developer currently advancing my skills in full-stack development, I am proficient in HTML, CSS, JavaScript and various modern development frameworks. My expertise in building responsive, user-friendly interfaces, combined with a keen eye for design, allows me to contribute effectively to software development projects.
